TERREBONNE GENERAL MEDICAL CENTER RECOGNIZED AS EMPLOYER OF CHOICE®

Terrebonne General Medical Center has been awarded the prestigious designation of “Employer of Choice®” by Employer of Choice, Inc. of Greensboro, North Carolina. The award recognizes an organization’s dedication to a higher level of employee continuity, workforce stability and performance, and assures customer loyalty and employee satisfaction. This is an exceptional honor since only 1% of hospitals in the nation operate at the level required for this designation.

“We are honored to receive this designation of Employer of Choice® and feel that this award confirms and recognizes the wonderfully dedicated and skilled team members and physicians at TGMC,” said Phyllis Peoples, President and CEO.

“Overall, Terrebonne General is an organization that inspires confidence in what is possible in the world of healthcare: Inspired and cohesive administrative, clinical, support and medical staff leadership, a stable, caring and highly competent nursing staff, and world-class physician care...all within an organization that has been able to maintain a strong community feel. Houma, Louisiana is fortunate to have such a strong and service oriented organization to provide care for its citizenry,” said Joyce L. Gioia, CMC, President of the Herman Group.

To receive the award, TGMC first completed the rigorous evaluation process, which included the management team, employees and medical staff, and then an opinion survey was completed. Based on the results of the survey and a site visit by Employer of Choice, Inc., TGMC was awarded this prestigious award.

The Employer of Choice designation is trademarked by the Herman Group and requires organizations to provide verification of the following rigorous standards: organizational culture, leadership, care of people, growth and opportunity, human resources processes, job and process design, and growing the next generation.
